House for sale

Country House For Sale

Price: €1,075,000

Bedrooms: 3

Bathrooms: -

M2 Living: -

M2 Plot: -

M2 Terrace: -

Address: Ibiza, Islas Baleares

Qualities The exterior carpentry will be composed of windows and door-windows in lacquered aluminum monoblock type with rupture of thermal bridge, sliding and double glazing with air chamber. The large format sliding joinery will be liftable. To obtain greater savings in consumption in the home the glazing is done with double glass type climalit or similar, formed by a glass emissive low to the interior of the house and air chamber with argon gas, improving the coefficient of thermal transmittance of glass up 40%, avoiding condensation, cold wall effects and with a significant energy saving for the user. Interior carpentry Entrance door to the reinforced dwelling, with sheet or reinforcement of steel in the interior, paneled in aluminum, with 3 points of anchorage. Interior doors of house decorated by means of milling in horizontal and lacquered, with decorative elements of glass. Sliding doors in ground floor and first as long as the interior layout allows Fitted wardrobes in bedrooms, with modulated lacquered doors with metal handles, structure and lined interior, with metal hanging bar, shelves and drawers. Electricity and Lighting Jung eNet Home System or similar for access control, lighting and environmental controls, allowing to handle all functions with an intuitive interface with local and remote control. Electrical mechanisms of 1st quality of the Jung brand or similar. Decorative... Read more

Qualities The exterior carpentry will be composed of windows and door-windows in lacquered aluminum monoblock type with rupture of thermal bridge, sliding and double glazing with air chamber. The large format sliding joinery will be liftable. To obtain greater savings in consumption in the home the glazing is done with double glass type climalit or similar, formed by a glass emissive low to the interior of the house and air chamber with argon gas, improving the coefficient of thermal transmittance of glass up 40%, avoiding condensation, cold wall effects and with a significant energy saving for the user. Interior carpentry Entrance door to the reinforced dwelling, with sheet or reinforcement of steel in the interior, paneled in aluminum, with 3 points of anchorage. Interior doors of house decorated by means of milling in horizontal and lacquered, with decorative elements of glass. Sliding doors in ground floor and first as long as the interior layout allows Fitted wardrobes in bedrooms, with modulated lacquered doors with metal handles, structure and lined interior, with metal hanging bar, shelves and drawers. Electricity and Lighting Jung eNet Home System or

similar for access control, lighting and environmental controls, allowing to handle all functions with an intuitive interface with local and remote control. Electrical mechanisms of 1st quality of the Jung brand or similar. Decorative lighting led in different points of the house. Recessed luminaires led ceiling for general lighting. Multimedia Installation of television made by multi switch for reception of multiple channels TDT and Satellite. Installation of ambient sound with Sonos system, Bose speakers or similar, and with wireless connectivity and internet connection. Data collection throughout the house, made using fiber optics. Wi-Fi connection throughout the house Security and CCTV Closed circuit video surveillance system with local or remote access. Continuous recording 24 hours. Advanced alarm system with partial night / day mode, total control from mobile application. Fire detection system, by smoke detector with immediate warning. Air conditioning and ACS Panasonic centralized intelligent air conditioning system or similar. With remote control, local, and centralized control. Underfloor heating, through water pipes, and zonal control by digital thermostats. Providing total comfort due to the absence of too hot foci. The absence of radiators supposes an increase of useful space of the house and improve the possibilities of interior decoration. Air conditioning with heat pump, system by individual machines per stay, with low pressure ducts, including individual controls. Fumes of NETCOON fiber and diffusers lacquered in white. Sanitary hot water (ACS), by means of Aquarea or similar system with accumulation of 300 liters. Swimming pools RGB led lighting (with chromatic change).
